

# ContiTech keeps your customers moving.

When it comes to form, fit, and function, ContiTech timing belts, timing belt kits, and serpentine belts are unrivaled. With Original Equipment approvals for many American, Asian, and European auto manufacturers, and a strong commitment to product development, it's no wonder we're a global industry leader.

And our superior standards don't end with our belts. The experienced sales staff of CRP Automotive, ContiTech's NAFTA market partner since 1954, is determined to help make your job easier. For quality and dependability that will keep your customers driving safely, trust ContiTech.

## Here's what makes ContiTech the right choice:

- **ContiTech Timing Belts** utilize the latest in design and material technology, ensuring a quiet and maintenance-free experience. Our program includes 265-plus belts, covering a wide range of early to late model applications.
- **ContiTech Timing Belt Kits** contain the timing belt and tensioners or idlers. By replacing the timing belt and its matching parts at the same time, you'll provide extra engine reliability as well as greater safety for your customers. With 190-plus kits available, we offer the best coverage available in the market.
- **ContiTech "Pro Series" Timing Kits** include a water pump, a hydraulic tensioner (when applicable), and every part needed to do a complete timing belt/water pump change. CRP Automotive currently offers 70 kits covering over 266 vehicle applications for import and domestic makes.
- **ContiTech Serpentine Belts** include a complete program of belts for driving generators, fans, water pumps, AC compressors, and power steering. With service life intervals up to 150,000 miles, our serpentine belts are worry-free. A lower profile design provides less noise and cooler running.
