

TRADE MULTIPLE PART NUMBERS FOR ONE

The Pro Series is a complete OE-quality timing belt replacement kit that includes the following:

- Timing Belt(s)
- Tensioners (hydraulic, if applicable)
- Idlers
- Water Pump

Vehicle manufacturers recommend that timing belts be replaced approximately every 60,000 to 80,000 miles and some with even greater extended intervals to 100,000 miles. They also recommend that the components of the timing system be changed simultaneously: the belt, idler, and tensioner pulleys, along with the water pump if it's driven by the timing belt.

What does this mean for you?

Replacing the timing belt and each related component at the same time assures the entire belt system will operate and perform correctly for the intended life of the belt. And with a Pro Series Timing Kit from CRP Automotive, you get all of the components and a perfect fit every time — which means more sales and fewer returns.

So, when you're ready to place your next order for a timing belt kit, be sure to ask for the Pro Series Timing Kit from CRP Automotive by name.

Fast Facts on Pro Series Timing Kits with ContiTech belts from CRP Automotive:

- A new series of timing belt kits complete with water pumps
- Kits contain OE-quality ContiTech belts, tensioners (hydraulic when applicable), idlers, and water pumps
- 98 kits covering more than 300 vehicle applications for import and domestic makes
- Covered by a lifetime guarantee, based on vehicle manufacturers' recommended belt change interval
